**Bugzilla link:** 1214675

**Description**

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1214675

Description of problem:

I'm trying to get host collection's 'unlimited-content-hosts' parameter value. When creating host collection, 'unlimited-content-hosts' can be set to either 'true' or 'false', but it looks like there is no way to verify what value was set - hammer's 'host-collection info' command doesn't return it.

Version-Release number of selected component (if applicable):

Satellite 6.1.0 Beta

How reproducible:

Always

Steps to Reproduce:

1. hammer host-collection create --name test123 --organization-id 1 --unlimited-content-hosts true
2. hammer -u admin -p changeme host-collection info --name test123 --organization-id 1

Actual results:

| ID: | 1 |
| Name: | test123 |

Limit:

Description:

Total Content Hosts: 0
Max Content Hosts:

Expected results:

| ID: | 1 |
| Name: | test123 |

Limit:

Description:

Total Content Hosts: 0
Max Content Hosts:

Unlimited Content Hosts: true

Additional info:

If I run 'hammer host-collection create --name test123 --organization-id 1 --unlimited-content-hosts false', 'Max Content Hosts' value will still be empty, so I can't check whether unlimited-content-hosts is set by 'Max Content Hosts' field.
