foreman should allow plugins to update the Rabl view_path

This is related to this issue:
https://github.com/theforeman/foreman_hooks/issues/24

I would like to have other plugins (in this case foreman_discovery) to be able to update the rabl path. Currently, rabl_init.rb sets the config.view_path. It should instead append to it.

-PP

Here's a pull request to fix this:
https://github.com/theforeman/foreman/pull/2596
