**Pull request:** https://github.com/theforeman/foreman-installer/pull/171

**Related issues:**
- Blocks Foreman - Tracker #8447: Puppet 4 support

**Description**
The installer ships a hostname check at checks/hostname.rb, which requires the 'facter' library to get the current parsed hostname. This should be replaced for AIO support to not require Facter as a library, but instead call facter hostname or an equivalent.
