Replace where_values calls on Rails scopes/relations

09/13/2016 07:07 AM - Dominic Cleal

Status: Closed
Priority: Normal
Assignee: Dominic Cleal
Category: Rails
Target version: 1.14.0
Difficulty: 
Pull request: https://github.com/theforeman/foreman/pull/3838

Description
Rails 5 removes (https://github.com/rails/rails/commit/c414fc6) the where_values method that was present on relations, which is used in two places in Foreman:

    app/models/filter.rb
72:    conditions = value ? limited.where_values.join(' AND ') : unlimited.where_values.map(&:to_sql).join(' AND ')

    test/functional/application_controller_subclass_test.rb
200:   refute_nil actual_scope.where_values.index{|condition| condition.left.name == 'field1'}

The replacement is either to use the public/documented where_values_hash method or to introspect where_clause (but that's 5.0+ only and again, rather a private API).
