### Priority: Normal
### Assignee: Kavita Gaikwad
### Category: Web Interface
### Target version: 1.14.1
### Difficulty: 
### Pull request: https://github.com/theforeman/foreman/pull/4101

### Triaged:
### Fixed in Releases:
### Found in Releases:

#### Bugzilla link:

#### Description
All tooltips disappeared when deselects any option from selected items.

#### Steps to reproduce:
1. There is organization "default Organization" which is assigned to user "Bob" and one host is associated with it.
2. Create one more organization. for example - "Test Org"
3. Go to edit page of user "Bob". We can see that "default organization" is disabled with tooltip - "This is used by Host" under Organization Tab.
   Check attachment [step1-edit-user-page.png]
4. Select "Test Org" under Organization Tab
5. See tooltip is still present on "default organization" hover. Attachment [step2-select-org-TestOrg.png]
6. De-select the "Test Org" from selected items. Attachment [step3-deselect-org-TestOrg.png]

Actual result -
All tooltips associated with disabled selected items are gone and CSS of those items are also changed.

Expected result -
All tooltips of disabled selected items should be remain as it is.

**Revision edfc2271 - 12/20/2016 12:33 PM - Kavita Gaikwad**
fixes #17630 - show tooltips after deselecting selected item

For example,
User who must be the owner of that host, is having an organization which is assigned to the same host then on edit page, you will see tooltip on that organization hover saying "This is used by host".
When you will select any other Organization and de-select it again, on de-selection of item all existing tooltips are disappeared.
