Foreman - Bug #19354

associated_type is set to a wrong value in audit_extensions.rb

04/23/2017 08:47 AM - Shimon Shtein

Status: Closed
Priority: Normal
Assignee: Ori Rabin
Category: Audit Log
Target version: 1.16.0

Pull request: https://github.com/theforeman/foreman/pull/4165

Description
When fixing STI types for :associated field in AuditExtensions#fix_auditable_type, the type is set to the one from :auditable object instead the one from :associated field.
It looks like a copy-paste error.

Associated revisions
Revision 364c5208 - 07/12/2017 05:03 AM - Ori Rabin
Fixes #17918,#19354 - Smart class parameters appear in audits

History
#1 - 04/24/2017 02:55 AM - Dominic Cleal
- Category set to Audit Log

Specifically, I think this means:

```ruby
self.associated_type = auditable.type if auditable_type == "Taxonomy" && auditable
```

Uses the auditable type, but sets associated_type.
