**Description of problem:**

It is not possible to create bookmark for Global Parameters, neither via API nor UI.

**API:**

Making HTTP POST request to [https://sat6.com/api/v2/bookmarks](https://sat6.com/api/v2/bookmarks) with options `{verify`: False, `auth`: `('admin', 'changeme')`, `'headers`: {'content-type': 'application/json'}} and data `{controller`: `common_parameters`}, `{query`: `"u5653u3defuf902\ud855\udcbf\ud849\udf20\ud835\udc10\ud86a\udecd\ud3da\ufa11"`, `public`: false, `name`: `"uZSPlCrazx"`}.

Received HTTP 422 response: `{error: {id: null, errors: {controller: ["common_parameters is not a valid controller"]}, full_messages: ["Controller common_parameters is not a valid controller"]}}`

**UI:**

After clicking on ’create bookmark’ modal window is opened, but after clicking on submit button page redirects to ’create bookmark’ page and further clicking on submit button has no effect.

According to production.log in this case also `common_parameters` is used as controller:
