Foreman - Feature #21012
Add host count to location API call

09/19/2017 12:15 PM - Daniel Lobato Garcia

Status: Closed
Priority: Normal
Assignee: 
Category: Organizations and Locations
Target version: 1.17.0
Difficulty: 

Pull request: https://github.com/theforeman/foreman/pull/4860

Triaged: 
Bugzilla link: 1474348

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1474348

Description of problem:
Currently, the API call to "/api/v2/locations/<id>" shows a lot of info, but does not show the number of hosts associated with the location. This is useful for users who use the API to produce reports on how many systems are in each location.

This info is available via the web UI in the locations page, but in order to get at the same information via the API, you have to do a search for each location and count the results.
