Foreman - Bug #21253

PG::Error: missing FROM-clause entry from items in Dashboard for Filtered role

10/09/2017 12:31 PM - Andrew Kofink

Status: Closed
Priority: Normal
Assignee: Andrew Kofink
Category:
Target version: 1.16.0
Difficulty:
Triaged:
Bugzilla link: 1481138

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1481138

Description of problem:

PG error on items in Dashboard such as latest Errata and latest events.

When creating a custom role with the following filters
1. Resource Miscellaneous => access_dashboard
2. Host => view_hosts, edit_hosts, destroy_hosts with unlimited unselected and search "host_collection = HostCollection1 or host_collection = HostCollection2"

And assign this role to the user.

Version-Release number of selected component (if applicable):
6.2.10

How reproducible:

Always

Steps to Reproduce:

1. Create a custom role 'Custom role'
2. Assign above mentioned filters to the above created Custom role
3. Assign this custom role to the user.
4. Try to login with this user.
5. Hit the dashboard menu

Actual results:

Failure: PG::Error: ERROR: subquery in FROM must have an alias
LINE 1: SELECT COUNT FROM (SELECT 1 AS count_column FROM...)

HINT: For example, FROM (SELECT ...) [AS] foo.

ON "hosts"."id" = "katello_host_collection_hosts"."host_id"
INNER JOIN "katello_host_collection_hosts"".
ON ON "katello_host_collection_hosts"."host_collection_id" = "katello_host_collection_hosts"."id"
WHERE "katello_host_collection_hosts"."name" = 'HostCollection1') OR ("hosts"."id" IN (SELECT "hosts"."id" FROM "hosts"
INNER JOIN "katello_host_collection_hosts""
ON "hosts"."id" = "katello_host_collection_hosts"."host_id"
INNER JOIN "katello_host_collection_hosts"
ON "katello_host_collection_hosts"."host_collection_id" = "katello_host_collection_hosts"."id"
WHERE "katello_host_collection_hosts"."name" = 'HostCollection2')

Pull request: https://github.com/theforeman/foreman/pull/4903

Fixed in Releases:

Found in Releases:

03/28/2022 1/2
WHERE "katello_host_collections"."name" = 'HostCollection2') LIMIT 6) subquery_for_count

**Expected results:**
User should be able to view the items latest Errata and latest events on dashboard

**Additional info:**
when changing the search filter with '~' in place of '=' it works

host_collection ~ HostCollection1 or host_collection ~ HostCollection2
