**Description**

In API v2 ssh_keys_controller in :index and :show method the 'user_id' parameter is documented as not required.

https://github.com/theforeman/foreman/blob/develop/app/controllers/api/v2/ssh_keys_controller.rb#L12
https://github.com/theforeman/foreman/blob/develop/app/controllers/api/v2/ssh_keys_controller.rb#L21

```ruby
param :user_id, String, :desc => N_("ID of the user")
```

It is part of the resource URL and needs to be required. Wrong documentation leads to problems with parameter resolving in Hammer CLI.

```
hammer user ssh-keys delete --user admin --name test
Could not delete the SSH Key: missing param 'user_id' in parameters
```
