Rails reports this is a "Feature request" that they do not plan to implement, but will welcome pull requests. We may need a way to convert from an MD5 based cache to a SHA256 or to convince rails that it is acceptable to have to rebuild the cache from scratch during an upgrade (if that is at all possible) - See https://github.com/rails/rails/issues/31203

#3 - 11/30/2017 12:41 AM - Dmitri Dolguikh
Opened a PR in Rails github project: https://github.com/rails/rails/pull/31289

#4 - 12/14/2017 06:38 PM - Dmitri Dolguikh
PR has been merged: https://github.com/rails/rails/commit/659c516bet2781cc66865fc786ed5dce682566d26

#5 - 12/15/2017 09:42 PM - Dmitri Dolguikh
- Status changed from New to Resolved

The feature should be available in Rails 5.2

#6 - 04/05/2018 06:09 PM - Dmitri Dolguikh
- Pull request https://github.com/spree/deface/pull/180 added

#7 - 04/05/2018 06:10 PM - Dmitri Dolguikh
- Pull request deleted (https://github.com/spree/deface/pull/180)

#8 - 05/11/2018 01:15 PM - Ivan Necas
For testing with Rails < 5.2, also this patch will be needed https://github.com/rails/rails/pull/31490, as the original change included `...` in the digest.
