Foreman - Bug #22052

Templates tab in Hosts>Operating Systems have confusing and misleading asterisks

12/21/2017 09:08 AM - Daniel Lobato Garcia

Status: Closed
Priority: Normal
Assignee: Aditi Puntambekar
Category: Templates
Target version:
Difficulty: trivial
Pull request: https://github.com/theforeman/foreman/pull/5902
Triaged: No
Fixed in Releases: 1.20.0
Bugzilla link: 1523147
Found in Releases:

Description
Description of problem:
In Hosts > Operating Systems, when you go to select the Templates, each template has an asterisk beside its name. This is confusing.

How reproducible:
Always

Steps to Reproduce:
2. Select an operating system, RHEL 7, or Fedora.
3. Select the Templates tab.
4. Every template option has an asterisk, which makes it look mandatory to make a selection for each one.

Actual results:
According to Lzapletal, only three are mandatory: PXE, Provision, and Finish template.

Expected results:
Only the mandatory template selections should have asterisks.

- Subject changed from Templates tab in Hosts>Operating Systems have confusing and misleading asterisks to Templates tab in Hosts>Operating Systems have confusing and misleading asterisks

I think we should remove all asterisks, which templates needs to be assigned is determined by what provisioning type you choose for this OS. In fact image based provisioning can work with finish template only. On the other hand that can lead to a confusion that no template is required. So alternative solution is keeping all asterisks but add help to the form that explains the purpose.
