**Description**
Cloned from [https://bugzilla.redhat.com/show_bug.cgi?id=1372468](https://bugzilla.redhat.com/show_bug.cgi?id=1372468)

**Description of problem:**
Please add a link from the Infrastructure->Subnets page for each subnet to a report which shows all hosts using this subnet

**Additional Info:**
When reviewing a subnet, it is helpful if I can quickly see every system using that subnet. Current reports only seem to let me filter on the Primary NIC Subnet.
