https://github.com/Katello/hammer-cli-katello/pull/629,
https://github.com/theforeman/hammer-cli-foreman/pull/401

Description
host create/update commands use environment

# hammer host create ----help | grep environment
--environment ENVIRONMENT_NAME Environment name
--environment-id ENVIRONMENT_ID

but host info reports puppet environment

# hammer host info --id 1 | head -n 5
Id: 1
Name: hostname..
Puppet Environment: production
Puppet CA Proxy: hostname..
Puppet Master Proxy: hostname..

environment was changed to puppet environment in 6e83c9d82183f39dd4fd611698c0437409e1ee7a

- Category set to Hosts

I agree that it would be better to name the parameters --puppet-environment instead of --environment. We should also consistently change the hostgroup command and possibly others that use --environment.

One implementation note:
When --puppet-environment is introduced, --environment should be hidden with a deprecation warning to keep backward compatibility. We can then remove it in the next version.
