Move PuppetCA autosigning to build queue

05/17/2018 03:14 PM - Julian Todt

Status: Closed
Priority: Normal
Assignee: Julian Todt
Category: PuppetCA
Target version: 1.19.0

Description
Currently foreman calls the smart proxy to create the autosign entry when the hosts requests its provisioning templates. Since we want to rework how PuppetCa autosinging works in the future, it would be better to do this directly in the hosts build queue.
