Facts for primary interface not imported in case of virtual interfaces (bridge in this case):

2018-05-20T10:46:17 88de1713 [app] [D] We have following interfaces 'br-private, enp2s0f0, enp2s0f1, bond1.1005, br-ipo, br-ipo-nic, enp130s0f0, enp130s0f1, enp129s0f0, enp129s0f1, bond0, bond1' based on facts
2018-05-20T10:46:18 88de1713 [app] [W] Saving br_private NIC for host cloud-lab15.example.org failed, skipping because:
2018-05-20T10:46:18 88de1713 [app] [W] Identifier has already been taken

This is because the information already in the database and should be updated instead of adding it again.

 Fixes #23654 - update even virtual interface facts

When getting the scope we shouldn’t rely on attributes and check all the interfaces even virtual. This commit also add some debug logging.
