Nightlies javascript does not work

You may reproduce by creating a new box with Forklift (vagrant up centos7-katello-nightly).

Check out the attached screenshot, but basically without JS users can't even click on the vertical navigation bar.

As you can see, assets:precompile and webpack:compile don't work after installation.

Can't find our webpack executable at /usr/share/foreman/node_modules/.bin/webpack - have you run `npm install`?

Rake aborted!
