Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1336439

Description of problem:
When creating new VMs in RHEV Compute Resource by default the network interface type is "virtio". It will be nice if one can select which interface to use directly in Satellite.

Version-Release number of selected component (if applicable):
6.1.X

How reproducible:
100%

Steps to Reproduce:
1. Create new VM from Satellite to RHEV Compute Resource
2. Check the Network Interface Type in RHEV

Actual results:
Automatically set to "virtio"

Expected results:
Be able to select different ones (virtio, rtl8139, e1000)
