Assigning environment on host create doesn’t check the assignment of organization/location

07/09/2018 11:01 AM - Ivan Necas

Status: Closed
Priority: Normal
Assignee: Ivan Necas
Category: Inventory
Target version: 1.20.0

Pull request: https://github.com/theforeman/foreman/pull/5793

Triaged: No
Fixed in Releases: 1.20.0

Bugzilla link: 1595161

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1595161

Steps to Reproduce:
1. make sure the puppet environment has puppet classes, but is not assigned to the organization or location that the host will be created in
2. # hammer -d -v -u admin -p changeme host create --architecture-id="1" --domain-id="4" --environment-id="6" --ip="186.107.94.90" --location-id="2" --mac="4c:f7:c4:84:e2:92" --medium-id="11" --name="jhutar$RANDOM" --operatingsystem-id="2" --organization-id="1" --partition-table-id="94" --puppet-class-ids="6" --root-password="..."

Actual results:
The host is created, without any warning, but assignment of puppet classes is wrong at the end

Expected results:
The hammer command fails with error, that the provided environment doesn’t belong to the organization/location

Associated revisions
Revision 488a94b5 - 07/23/2018 01:03 PM - Ivan Necas
Fixes #24199 - validate taxonomy of host environment on create (#5793)

- Fixes #24199 - validate taxonomy of host environment on create

Otherwise, we allowed assigning the environment from different organization/location to host and it was not consistent with the UI behaviour.

It was also causing strange behavior when it comes to the assignment of puppet classes.
