**Description**

Foreman keeps loading the bookmarks, even if the dropdown has not opened, in recent version (since #20839) the bookmarks are loaded via API.

I would like to fetch the data only when the dropdown is actually clicked instead of always.

fixes #24380 - load bookmarks on demand

This commits change that bookmarks are fetched (on every index action) only once the bookmarks dropdown is opened, this avoids extra API call on most index pages when users don't use bookmarks.
