Description
I've disabled alerts on 10 hosts.

When I click on the corresponding (default) widget link, it actually searches hosts with disabled alerts AND out of sync. So, I have in my case 2 results instead of the 10 expected ones.

The configured search should only match hosts with disabled alerts, without those out of sync.

We should most likely revisit the widgets data, Host Configuration Chart seems to also count host with disabled alerts in counters

Another out of sync count issue, if that could help:
