Description
There's couple of things that should be fixed:

- Stories for new components created before the docs were added into the storybook remained on the top level in menu. They should be moved under "Components"
- Link to "Adding new components" on the "Getting started" leads to 404 when the storybook is pushed into gh-pages
- There are additional scrollbars around the content iframe in some browsers

Associated revisions
Revision f54955bb - 08/22/2018 01:28 PM - Tomáš Strachota
Fixes #24685 - fix minor issues in the storybook
- all components moved under "Components" in the menu
- link to "Adding new components" works on gh-pages now
- hides additional scrollbars around the content iframe
