Description
We check this:

```ruby
node do |host|
  { :parameters => partial("api/v2/parameters/index", :object => host.host_parameters.authorized ) }
end
```

This makes no sense, must be:

```ruby
node do |host|
  { :parameters => partial("api/v2/parameters/index", :object => host.host_parameters.authorized (:view_params)) }
end
```
