## Description

This PR ([https://github.com/theforeman/hammer-cli/pull/251](https://github.com/theforeman/hammer-cli/pull/251)) introduced the `:warning` and `:hidden` options to subcommands, allowing us to show deprecation warnings when a user uses the command (e.g. [https://github.com/theforeman/hammer-cli-foreman/blob/master/lib/hammer_cli_foreman.rb#L106](https://github.com/theforeman/hammer-cli-foreman/blob/master/lib/hammer_cli_foreman.rb#L106)). We should have some documentation in the readme to show how this is done rather than relying on developers to search through PRs and grep code to figure it out.
