Description

Steps to Reproduce:
1. Create some hosts
2. Goto Dashboard
3. Look at "Host Configuration Status for all" component => "hosts with no reports", that should show a number > 0 of not reported hosts
4. Click on "hosts with no reports"

Actual results:
No hosts listed

Expected results:
The same number of hosts indicated in the dashboard "hosts with no reports"

Additional info:
1- The query associated with "hosts with no reports" should be wrong, now the query is as following

'last_report > "30 minutes ago" and not has last_report and status.enabled = true'

should be

'not has last_report and status.enabled = true'
