"Cores" should be reworded to "Cores per socket"

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1627108

Description of problem:
In Hosts -> Create Host -> Virtual Machine for a RHEV Compute Resource, "Cores" should be reworded to "Cores per socket" as the real number of cores of the VM will be "$cores * $sockets", not "$cores".
