Menu and top bar will disappear periodically on page refresh/change

We will get this behavior along with this error in the console:

VM779 vendor.js:148812 Uncaught TypeError: Cannot read property 'firstname' of undefined

Revision bac064a7 - 12/20/2018 09:54 AM - John Mitsch
Fixes #25467 - The menu and top bar will disappear periodically

I haven't been able to consistently reproduce this, but myself and other devs have seen the menu and top bar not reload on page refresh. It seems to be correlated to an error found in the JS console: Uncaught TypeError: Cannot read property 'firstname' of undefined

This commit adds a check that user.current_user.user is defined in addition to the other checks.
