Foreman - Bug #25485

Operatingsystem field 'Release Name' should be mandatory for Debian-family

Description
In Hosts->Operating System there is a field 'Release Name' for 'Debian'-family entries.
IMHO this field should be mandatory, because it is required for e.g. downloading kernel and initrd for PXELinux installation.

Question: Are there any known scenarios, where this field cannot be specified and therefore must be empty?

Yes, makes sense. Patches welcome. CLI should require it too then.
