**Pull request:** [https://github.com/theforeman/foreman/pull/6269](https://github.com/theforeman/foreman/pull/6269)

**Description**

The eventhandler for ‘popstate’ is not working as intended. the `changeActiveonBack` function was called even though there was no back click in the browser, resulting in unneeded action calls.

also fixed dispatching an action for changing the `activeMenu` which is equal to the current one.
