Revision b51bf342 - 11/24/2019 01:27 PM - Tomer Brisker
Fixes #25602 - Correct tests for user role audits

Auditing user role changes should show the default role in the previous version. Due to a bug in Rails 5.2.1 which is fixed in 5.2.2, this was not showing up when the object was saved without reloading. We now reload explicitly to allow backward compatibility for both Rails versions, the reload can be removed once we upgrade to newer Rails.
