**Pull request:** [https://github.com/theforeman/foreman/pull/6710](https://github.com/theforeman/foreman/pull/6710)

**Triaged:** No

**Fixed in Releases:** 1.24.0

**Bugzilla link:** 1647781

**Description**

Findings -

Katello::Content keeps the information about content i.e cp_content_id, content_type, content_url.

Product :has_many association with contents and :has_many association with root_repositories.
Inside root_repositories, it just keep content_id no association with content but 'content' method definition is there.

In audit record after creating a repository under product I can see audited_changes includes -> {"content_id"=>[nil, "155136016057"]}.

But as there is no content association mentioned in root_repository and while displaying information it tries to fetch association using ".reflect_on_association", it displays empty data.

So, this is issue while displaying content information on UI.
