- https://github.com/theforeman/foreman-installer/pull/337

**Triaged:**
No

**Bugzilla link:**

**Description**
Kafo 3 removes compatibility with older Puppet versions. Doing so removes a lot of deprecation warnings and unused code. It also brings real compatibility with Puppet 6.

It does require some changes:
- Packaging should be updated
- The hiera config must be updated to version 5.
