- Status changed from New to Ready For Testing
- Pull request https://github.com/theforeman/puppet-qpid/pull/120 added

#3 - 04/09/2019 05:58 PM - The Foreman Bot
- Pull request https://github.com/theforeman/puppet-katello/pull/283 added

#4 - 04/09/2019 06:01 PM - The Foreman Bot
- Pull request https://github.com/theforeman/puppet-foreman_proxy_content/pull/197 added

03/14/2020
To test (assumes forklifted dev env):

- follow forklift docs (https://github.com/theforeman/forklift/blob/master/docs/development.md#test-puppet-module-pull-requests) to test the linked PRs
- 'vagrant provision centos7-katello-devel'
- verify that /etc/qpid/qpid.acl is populated according to the PR
- verify that /etc/qpid-dispatch/qdrouter.conf "connector" has sasl-mechanism PLAIN, sasl-username katello_agent and sasl-password that resembles a password
- verify that services qpidd and qdrouterd are running properly
- register a client, verify that package actions can be performed as usual
