Pull request: https://github.com/theforeman/foreman/pull/6859

Fixed in Releases: 2.0.0

Description

https://projects.theforeman.org/issues/17964 had been resolved, but some resources (organization, location, product, job template, etc.) are still missing apidoc extension with list of fields to use in a search.

The fix should be easy enough: review all resources and their list endpoints and ensure that each of them has added scoped search description (e.g. addScopedSearchDescriptionFor(resource)).
