**Description**

Cloned from [https://bugzilla.redhat.com/show_bug.cgi?id=1729038](https://bugzilla.redhat.com/show_bug.cgi?id=1729038)

**Description of problem:**

We now have cloud init template that helps with provisioning with Vmware using userdata enabled images

**Version-Release number of selected component (if applicable):**

Satellite 6.6 snap 10

**How reproducible:**

Always

**Steps to Reproduce:**

1. Have a cloud init(userdata) enabled as template on Vmware
2. Add it to satellite
3. Provision using the template

**Actual results:**

The provisioned box is not subscribed to satellite

As the cloud init template is missing redhat_register snippet

**Expected results:**

The provisioned box should be subscribed to Satellite

**Additional info:**

Following this guide to reproduce:

[https://access.redhat.com/blogs/1169563/posts/3640721](https://access.redhat.com/blogs/1169563/posts/3640721)

**History**

1. **#1 - 07/22/2019 07:28 AM - Marek Hulán**
   - Assignee changed from Chris Roberts to Lukas Zapletal
   - Subject changed from Cloud init template missing redhat_register snippet to Cloud init template missing redhat_register snippet

2. **#2 - 07/22/2019 07:30 AM - Marek Hulán**
   - Status changed from New to Ready For Testing
   - Pull request https://github.com/theforeman/community-templates/pull/596 added

3. **#3 - 07/22/2019 03:59 PM - Lukas Zapletal**
   - Fixed in Releases 1.23.0 added
PR was merged but missing "Fixes #" format message so the issue wasn't auto-closed.
