**Description**

When building a DEB package of `foreman_ansible`:

```bash
node --max_old_space_size=2048 /usr/share/foreman/node_modules/webpack/bin/webpack.js --config /usr/share/foreman/config/webpack.config.js --bail --env.pluginName=foreman_ansible
```

The output includes various files generated by webpack for the `foreman_ansible` plugin, including:

- **Localizations**:
  - `ca-21c2e6718846ef25789b.js.map` (34.9 kB)
  - `sv-f8d5a88a254db9374bbe1.js` (2.86 kB)
  - `sv-f8d5a88a254db9374bbe1.js.gz` (790 bytes)

- **Bundles**:
  - `bundle-5e2d83a5638034012011.js.map` (887 kB)
  - `bundle-5e2d83a5638034012011.js.gz` (100 kB)
  - `bundle-v0.1.1-production-708c93425541812ff58.js` (5.32 MB)

- **Vendors**:
  - `vendor-3136655871aada2a0b93.js.map` (1.1 MB)
  - `vendor-3136655871aada2a0b93.js.gz` (29.1 kB)

- **Other Files**:
  - `manifest.json.gz` (1.08 kB)
  - `foreman_ansible/foreman_ansible-037bd611d93047fc37f4.js.map` (133 bytes)

The webpack compile for plugins also generates files for the vendor package.
Because we're putting the whole webpack folder into the resulting DEB package, this is now broken on install:

Preparing to unpack .../8-ruby-foreman-ansible_3.0.6-1_all.deb ...
Unpacking ruby-foreman-ansible (3.0.6-1) over (3.0.3-1) ...
dpkg: error processing archive /tmp/apt-dpkg-install-zSUTeZ/8-ruby-foreman-ansible_3.0.6-1_all.deb
(--unpack):
  trying to overwrite '/var/lib/foreman/public/webpack/foreman-vendor.bundle-v0.1.1-production-708c93425c541812ff58.css', which is also in package foreman 9999-bionic+scratchbuild+20190807120255
dpkg-deb: error: paste subprocess was killed by signal (Broken pipe)
Errors were encountered while processing:
/tmp/apt-dpkg-install-zSUTeZ/8-ruby-foreman-ansible_3.0.6-1_all.deb
E: Sub-process /usr/bin/dpkg returned an error code (1)

It would be super nice, if these could get excluded in the webpack config on plugin compiles.
