Foreman - Bug #27662

New template input has Resource Type visible even it's input type is not using this value.

08/20/2019 01:10 AM - Ondřej Ezr

Difficulty:
Triaged: Yes
Bugzilla link: 1743525

Pull request: https://github.com/theforeman/foreman/pull/6991
Fixed in Releases: 1.24.0
Found in Releases:

Description
1. monitor -> report template -> create report template
2. inputs (tab) -> value type Search
3. Add another input (button Add input) and there is automatically Value type Plain together with Resource Type - Activation Keys (which is wrong)

For Value type Plain there should be field Options and not Resource Type.

Actual result: When user add another input, right after previous input where value type was equal to Search, then for Value type Plain there is still field Resource type.

Expected result: When user add another input, right after previous input where value type was equal to Search, then Value type Plain should display field with name Options instead of Resource type.
