**Description**
The best way to put it would be a setting (easily viewed, ready to be changed if something went wrong e.t.c).

Revision a9881fb9 - 09/05/2019 08:55 AM - Shimon Shtein
Fixes #27724 - Add a unique-id setting to foreman. (#7003)
This introduces a persisted randomly generated identifier of the Foreman instance. This is useful for correlating foreman-debug tarballs with logs and other debugging data that users upload to developers when they need help. This can be also useful to identify multiple instances in external systems, e.g. when workflows across multiple Foremans are orchestrated.
