**Description**

Cloned from [https://bugzilla.redhat.com/show_bug.cgi?id=1724780](https://bugzilla.redhat.com/show_bug.cgi?id=1724780)

**Description of problem:**

**Version-Release number of selected component (if applicable):**

**How reproducible:**

Always

**Steps to Reproduce:**

1. Create a Hostgroup, add deploy by as Vmware compute resource
2. Create a Host, using the hostgroup, Vmware would be set
3. Go to Virtual Machine tab

**Actual results:**

No storage section, and cannot fetch resource pool

**Expected results:**

There should be a storage section and resource pool should be populated against selected Cluster

**Additional info:**

Remove the Vmware provider in create host wizard and re-select

Screenshot has firefox error

Chrome error:

```
3vmware.js:59 Uncaught TypeError: Cannot read property 'datastoresUrl' of undefined
