Foreman - Bug #27830
Unable to load audits page - undefined method `abstract_class?' for Object:Class
09/11/2019 11:11 AM - Marek Hulán

Status: Closed
Priority: Normal
Assignee: Kavita Gaikwad
Category: Audit Log
Target version:
Difficulty:
Triaged: No
Bugzilla link: 1750846

Pull request: https://github.com/theforeman/foreman/pull/7034
Fixed in Releases: 1.24.0
Found in Releases:

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1750846

Description of problem:
Audits page doesn't load, it only shows the following ISE:
undefined method `abstract_class?' for Object:Class
I tried to list audits using hammer and it worked, so I guess this is webui issue.

Version-Release number of selected component (if applicable):
6.6.0 snap#19

How reproducible:
always

Steps to Reproduce:
1. visit audits page

Fixes #27830 - fix audit's main_objects list to load audit page (#7034)
While getting Audit's main_objects list, in case of superclass ActiveRecord::Base method call .table_exists? raises an exception
undefined method `abstract_class?' for Object:Class.
So, excluding this superclass from parent_list.

to Unable to load audits page - undefined method `abstract_class?' for Object:Class
- Fixed in Releases 1.24.0 added

this is 1.24 blocker
From rails console, "ActiveRecord::Base" is not found inside superclasses while getting audit main_objects. But on web-ui, getting listed inside superclasses.

I guess, on server start something get register that's why getting it.

ActiveRecord::Base.table_exists? is raising an exception "undefined method `abstract_class?' for Object:Class"
