Installer - Bug #27846

by default 'log_min_duration = 1000' should be configured for PostgreSQL

Description
To gather more data when checking support cases, having 'log_min_duration = 1000' in PostgreSQL config by default would be great.

Expected results:
'log_min_duration = 500' should be in PostgreSQL config file on both freshly installed and upgraded Satellite:

1. grep log_min_duration /var/lib/pgsql/data/postgresql.conf

Additional info:
Tuning profiles already have 'log_min_duration = 500'
https://github.com/RedHatSatellite/satellite-support/tree/master/tuning-profiles

Note this can be also achieved via /etc/foreman-installer/custom-hiera.yaml by:

postgresql::server::config_entries:
  log_min_duration_statement: 1000

By including it as default, users can only disable it by setting the value to -1 in custom-hiera.yaml.

Associated revisions
Revision 27cae009 - 09/16/2019 03:27 PM - Ewoud Kohl van Wijngaarden
Fixes #27846 - Add Postgresql log_min_duration

With this change, queries taking longer than a second will be logged.
This makes it easier to debug performance issues.

Users can disable this by setting the value to -1 via another hiera layer.

Revision f0b57e89 - 09/17/2019 08:08 PM - Ewoud Kohl van Wijngaarden
Refs #27846 - Correct log_min_duration_statement

Due to a copy paste error an invalid configuration option was used. This corrects it to the actual configuration option.
