Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1746780

Description of problem:
Currently, the host parameter is accessible in report template only using host.info['parameters']['Parameter Name'] but needs to set "Safemode rendering" to false. We should able to access this when "Safemode rendering" is set to true

Here is an example template

<%- load_hosts().each_record do |host| -%>
<%-   report_row({
'Name': host.name,

'LOB': host.info['parameters']['SomeParameter']

}) -%>
<%- end -%>

Version-Release number of selected component (if applicable): 6.5

How reproducible: Always

Actual results: Getting Error message → Warning! There was an error rendering the parameter report template: undefined method '#info' for Host::Managed::Jail (Host::Managed)

Expected results: parameter should be accessible when "Safemode rendering" to true
