Foreman - Bug #27927

Parent object properties are not propagated to Child objects in Location and Host Group

09/24/2019 09:02 AM - Marek Hulán

Status: Closed
Priority: Normal
Assignee: Ondřej Ezr
Category: Host groups

Description
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1751981

Description of problem:
In a Parent-Child relation (e.g. in Location and Host Group) the Parent properties are not being propagated to the Child objects.

Version-Release number of selected component (if applicable):

How reproducible:
Consistent

Steps to Reproduce:
1. Create Parent Location with Subnet assigned
2. Create a Child Location from this Parent
3. Create a host and assign it to the Child Location

Actual results:
Error message: Subnet not defined for host's location
(this happens both via GUI's "Create Host" and hammer-cli 'hammer host create --name <name> --location <Child Location>...'

Expected results:
Host created successfully with assigned Location's properties

Additional info:
Related to bug #1733241 where hammer doesn't support inheritance properties.
