Refs #28068 - Include dynflow-sidekiq.rb

This file is needed to start dynflow-sidekiq@.service since it's mentioned as a --require path.

Refs #28068 - Drop old dynflowd service

Now that foreman-dynflow-sidekiq is in place, there's no more need for the old dynflowd.

Note that the old dynflowd had a sysvinit script but the new one only works with systemd. This is because it uses multiple instances and this keeps the installer simple. Technically it could work with sysvinit, but no such support is planned.
