### Description

An "images" list from GCE is being fetched but the 'id' field is not being shown if I choose fields to display like "id, name" or even if I choose any predefined sets. The issue is also repro with VMWare image listing.

#### How Reproducible:

Always

#### Steps:

1. Attempt to list images (name and uuids) from GCE/VMWare Compute Resources.
   1. `hammer compute-resource images --fields 'ALL' --id 1`
   2. `hammer compute-resource images --fields 'id,name' --id 1`

#### Actual Behavior:

1. The list shows the names of all available images.
2. The list doesn't show id(UUIDs of images) field in both the cases.

#### Expected Behavior:

1. The hammer listing of CR images should also show the ids/uuids of an images along with names.
