### Description
Cloned from [https://bugzilla.redhat.com/show_bug.cgi?id=1772079](https://bugzilla.redhat.com/show_bug.cgi?id=1772079)

### Description of problem:
This doesn't work on foreman pages only (katello works fine).

When I'm at entity (e.g. subnet) details page (or edit page) and I want to navigate to All entities (subnet) by using the main menu, it doesn't work (does nothing).

This behavior change heavily influences our automation

### Version-Release number of selected component (if applicable):
6.7.0-1

### Steps to Reproduce:
1. navigate to any foreman entity page
2. create the entity
3. navigate to the entity "edit" page
4. use main menu to go to the same page as in step #1

### Actual results:
no action is triggered. Foreman probably treats the current page as the destination.

### Expected results:
Entity overview page should be loaded

### Additional info:
this is a regression from 6.6.0
