Fixes #28530: Combine post install hooks into a single one

This moves to a single post install hook to handle all scenarios. This introduces the message helpers to Foreman hooks and starts to provide the hook extensions Katello uses.

Refs #28530 - Correctly set the hook_dirs

3123236437240575416d5e698815151913bbc6db combined the hook dirs, but that broke the actual installation where it stayed as ./katello/hooks instead of /usr/share/foreman-installer/katello/hooks.

Refs #28530: Ensure hook dir is set using proper installer dir
