refactor returned payload from API middleware

12/29/2019 02:40 PM - Ron Lavi

Status: Closed
Priority: Normal
Assignee: Ron Lavi
Category: JavaScript stack

Pull request: https://github.com/theforeman/foreman/pull/7301
Fixed in Releases: 2.0.0
Found in Releases:

Description
currently the returned payload is a mix of data and payload, looks like: `payload: { ...payload, ...data }` which is quite risky and not the best approach to handle API responses, in this refactor I will split it into results and params, as params are the values which was passed to the API request, it will look something like this: `payload: { results: data, params: payload }` in the API middleware.

Associated revisions
Revision 57c6f203 - 01/01/2020 08:59 AM - Ron Lavi
Fixes #28584 - refactor API middleware payload
split the response and payload which are passed from the middleware to the reducers.
