Description of problem:
As all of the option under hammer auth login oauth are related to oidc and protocol we are using for authentication is openidc, it is valid to change from oauth to oidc.

Version-Release number of selected component (if applicable):
Satellite 6.7 snap 7
tfm-rubygem-hammer_cli-0.19.0-2.el7sat.noarch

How reproducible:
always

Steps to Reproduce:
1. # hammer auth login oauth -h

Usage:
hammer auth login oauth [OPTIONS]

Options:
-a, --oidc-authorization-endpoint OPENIDC-AUTHORIZATION-ENDPOINT Openidc provider URL which issues authentication code
-c, --oidc-client-id OPENIDC-CLIENT-ID Client id used in the Openidc provider
-f, --two-factor Authenticate with two factor
-h, --help Print help
-p, --password PASSWORD Password to access the remote system
-r, --oidc-redirect-uri OPENIDC-REDIRECT-URI Redirect URI for the authentication code grant flow
-t, --oidc-token-endpoint OPENIDC-TOKEN-ENDPOINT Openidc provider URL which issues access token
-u, --username USERNAME Username to access the remote system

Actual results:
Command is hammer auth login oauth

05/10/2020
Expected results:
Command should be hammer auth login oidc

Additional info:
Also there is typo, good to have it fixed

```
-r, --oidc-redirect-uri OPENIDC-REDIRECT-URI Redirect URI for the authencation code grant flow
```
