**Description**

On latest nightly, when something goes wrong during the install, the output still contains two "Success" lines:

Preparing installation Done
Something went wrong! Check the log for ERROR-level output
Success!
* Foreman is running at https://centos7-fat.yatsu.example.com
  Initial credentials are admin / changeme
  Success!
* Foreman Proxy is running at https://centos7-fat.yatsu.example.com:8443
  The full log is at /var/log/foreman-installer/foreman.log

Also in the success case, I think one "Success!" would be sufficient?

Preparing installation Done
Success!
Success!
* Foreman is running at https://centos7-fat.yatsu.example.com
  Initial credentials are admin / changeme
  Success!
* Foreman Proxy is running at https://centos7-fat.yatsu.example.com:8443
